

BEHIND GLASS

"PERF DYNAPLEX" FIXED PANELS (TO WINDOW MULLION)

Dynaflair will provide you with custom made, fixed panels that permanently mount inside or outside of the glass. These panels are made from our proprietary extrusion shapes and they have the "look" of operating rolling closures without having the accompanying expensive operating mechanisms. Panel arrays are strongly fastened all around to the window mullion extrusions. Each window gets it's own custom fitted insert that may be mounted right up against the glass.
